Professional Summary

Entry-level Python Full Stack Developer with a strong foundation in Python, Django, React.js, MySQL, JavaScript, HTML, CSS, and REST API development. Skilled in building responsive full-stack web applications with CRUD operations, database integration, JWT Authentication, and frontend-backend connectivity. Passionate about problem-solving, clean code practices, and continuous learning.

Education

Bachelor of Technology - Artificial Intelligence and Data Science 2021 – 2025

Dhanalakshmi College of Engineering

CGPA: 8.11

Higher Secondary Certificate 2021

D.G.M Higher Secondary School

Percentage: 84%

Secondary School Leaving Certificate 2018

S.D.Sion Matric Higher Secondary School

Percentage: 81%

Technical Skills

- **Programming Languages:** Python, SQL, JavaScript (ES6+)
- **Frontend Technologies:** HTML, CSS, Bootstrap, Tailwind CSS, React.js
- **Backend Technologies:** Django, Django REST Framework (DRF), REST APIs, JWT Authentication
- **Databases:** MySQL, PostgreSQL, SQLite
- **Core Concepts:** CRUD Operations, RESTful APIs, Authentication & Authorization, Responsive Web Design, Object-Oriented Programming (OOP), Version Control (Git), API Testing (Postman)

Projects

SmartHire Pro – Recruitment & Applicant Tracking System

- Built a full-stack recruitment platform using Django REST Framework, React.js, PostgreSQL, and JWT Authentication for job posting and candidate management.
- Developed secure REST APIs with role-based access, resume upload, job search, application tracking, and recruiter/candidate dashboards.
- Designed a responsive user interface using React.js and Tailwind CSS while optimizing backend performance, database queries, and authentication workflows.

Full Stack Blog Application using Django

- Built a full-stack blog application with user authentication and CRUD operations for posts.
- Implemented profile image upload, password reset via email, and pagination features.
- Integrated MySQL database with Django ORM and designed responsive UI using Bootstrap and Django templates.

React-Based E-Commerce Shopping Platform

- Built a responsive e-commerce web application using React.js, Tailwind CSS, and React Router DOM.
- Implemented product search, category filtering, cart management, and checkout functionality.
- Used Context API for global state management and integrated reusable React components for scalable frontend architecture.

Certification

- Python Full Stack Development – Pumo Technovation
